Care Call Mobile Application (Authenticare)

Provider Webinars

March 16, 2016

March 18, 2016

**Presented by
Community Long Term Care
And
First Data**

The objectives of this meeting are to:

- Provide a brief overview of Care Call
- Provide training on the Care Call mobile application
- Address provider concerns

Care Call was implemented in October, 2002 as an IVR system that:

- **Provided prior approval for CLTC waiver services**
- **Allowed providers to document service delivery by calling a phone number to check in/out**
- **Submitted claims to MMIS on behalf of providers**
- **Allowed providers to do reporting**

Biggest challenge in 2002

ROTARY PHONES
and Care Call required a
touch tone phone

Care Call 2016

- Provides prior approval for CLTC waiver services
- Allows providers to document service delivery by calling a phone number to check in/out
- Allows providers to document service delivery by using a smart phone mobile application (Authenticare)

Biggest challenge in 2016

- No rotary phone
- No touchtone phone
- No stationary phone in the home

Causes of the 2016 Challenges

- **Trend away from landlines toward use of cell phones**
- **Acceleration of free cell phones**
- **Smart phones and tablets becoming common**

How CLTC is addressing the 2016 Challenge

- **Development of a mobile application with the Care Call vendor, First Data**
- **Providers were informed of the mobile app in 2013 during CLTC regional training sessions**
- **An Android version of the mobile app was implemented in 2014 while work continued on the iPhone app**
- **Providers were informed when the iPhone app becomes available, the mobile app will be required for participants without a landline phone**
- **Memo to providers on 12/3/15 with notification that the iPhone app is now available and will be required effective 04/01/16**

December 3, 2015

Memorandum

To: CLTC Providers of In-Home Service
From: Tony Matthews and Rhonda C. Feaster
Subject: Care Call Mobile Application

We are pleased to announce that the I-Phone application for Care Call ~~Authenticare~~ has been fully developed and is in the Apple Store. The application can be purchased and downloaded for free by searching for "Authenticare". First Data is in the process of developing a user's guide for the I-Phone application. When the guide is developed, a notice will be posted in Phoenix and the document uploaded to the help section in Phoenix.

Providers were previously informed that when the I-Phone application was fully developed, the mobile application would be required for participants without a land line phone. In order to give your company ample time to accommodate this requirement, April 1, 2016 is the date use of the mobile application will be required for participants without a landline phone.

We appreciate the patience you had while we worked with First Data to get the I-Phone application developed. We also appreciate your understanding when we rescinded previous notices requiring use of the mobile application.

For Android phones, First Data is in the process of trying to have this placed in the Play Store to make it easier to download. In the meantime, instructions on how to download the application for Android phones can be found in the help section of Phoenix.

We have also been getting reports of workers getting error messages when dialing into Care Call from land line phones. We believe this error occurs when the worker does not enter a "1" prior to dialing the remaining digits. Please remind workers that although a "1" is not required when dialing long distance on cell phones, a "1" is required when dialing long distance from a land line phone. A problem only needs to be report when you are certain your worker is getting an error when the "1" is included during dialing.

CLTC is excited about the new changes and has been working diligently to make Care Call more efficient. Special thanks are extended to the providers who diligently worked with us and performed testing on the I-phone application.

Thanks also to each of you for your continued support of the CLTC program. If you have any questions, concerns, or comments, feel free to e-mail them to provider-distribution@scdhhs.gov.

Don't miss the April 1,
2016 deadline

Find me in the App Store
or keep using me on your
Android device.

What providers need to do:

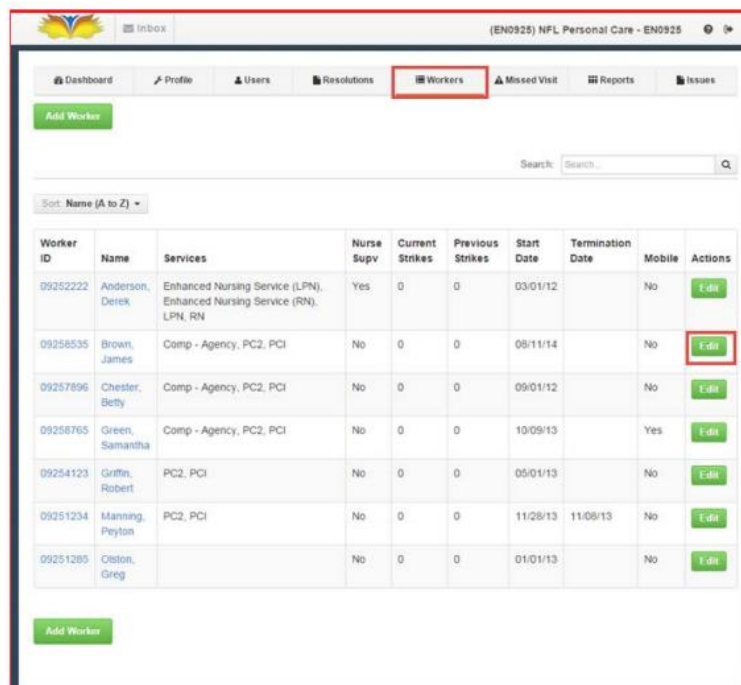

- **Review the manuals located in Phoenix Provider Portal (there is a different manual for Android and iPhone)**
- **Set up workers and devices in Phoenix**
- **Train workers**

Registering Workers in Phoenix Provider Portal

**The following slides are in
the Mobile App User Guide**

Provider Mobile App Worker Registration in the Phoenix Provider Portal

Before a worker can use the AuthentiCare Mobile App, the provider must login to the Phoenix Provider Portal and register the worker and the worker's phone. From the Phoenix Provider Portal, the user will click the Worker's Tab.

Worker ID	Name	Services	Nurse Supv	Current Strikes	Previous Strikes	Start Date	Termination Date	Mobile	Actions
09252222	Anderson, Derek	Enhanced Nursing Service (LPN), Enhanced Nursing Service (RN), LPN, RN	Yes	0	0	03/01/12		No	Edit
09258535	Brown, James	Comp - Agency, PC2, PCI	No	0	0	08/11/14		No	Edit
09257896	Chester, Betty	Comp - Agency, PC2, PCI	No	0	0	09/01/12		No	Edit
09258765	Green, Samantha	Comp - Agency, PC2, PCI	No	0	0	10/09/13		Yes	Edit
09254123	Griffin, Robert	PC2, PCI	No	0	0	05/01/13		No	Edit
09251234	Manning, Peyton	PC2, PCI	No	0	0	11/26/13	11/08/13	No	Edit
09251285	Ostton, Greg		No	0	0	01/01/13		No	Edit

Click the Edit button beside the worker being set up for the mobile app.

Enter a mobile password to be used by the worker for the initial login to the mobile app. Once the user saves the mobile app information, the password entered will no longer display on the screen. The user may also use this field to reset a worker's mobile password. An office number may also be entered to make it easy for the worker to call the office from the app. This is not required.

Click the Add mobile device link.

Enter the mobile device phone number, without parentheses and/or dashes, and the device ID for the worker's phone. The user may click the Add mobile device link to add additional phones for the worker if needed. Once all information has been entered, click Save. The user may sign into the mobile app with this device after the information is saved.

Registering Agency Owned Phones in the Phoenix Provider Portal

The user must log into the Phoenix Provider Portal and click on the Profile Tab. From that tab, the user will click the Mobile Devices sub tab.

Click the Edit button, and then click Add Mobile Device.

Enter the mobile device phone number, without parentheses or dashes, and the device ID. If more than one worker will use the device, click the Shared? checkbox. To add additional devices, click the Add mobile device link. Once all information has been keyed, click Save.

Each worker will have to be marked as mobile enabled and given a password on the Workers Tab.

Mobile App Walkthrough and Tips

Go Forward Device Requirements

- Only iPhone and Android phones are supported
- 10 MB of storage for AuthentiCare; up to 300 MB of storage for Google Play services
- Data consumption: Less than 5MB/Mo.
(3 visits/day, 5 days per week)
- Q/R code read app installed (usually standard)
- Android phone must be version 4.4 or higher (Heartbleed fix)
(Some Providers running Android 4.1)
- Android must have Google Play Services installed, enabled, and fully up to date (Settings -> Apps) – should come with phone
- iPhone must be iOS 8.0 or greater
(Latest version recommended.)

Downloading the Mobile App

Android

- Phone settings must allow “non-market” apps to install
- Navigate web browser to:

<https://www.authenticare.com/scdhhs/mobile/download.html>

- Accept free license agreement
- Download and install
- Start the app and enter setup code

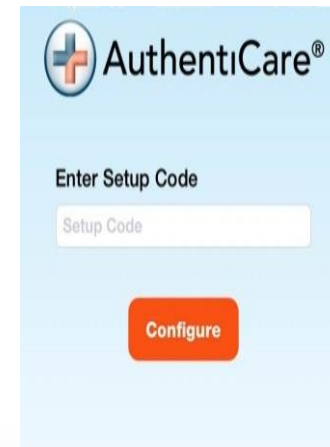

Codes:

Production – SCDHHSPRD
Training -- SCTRAINPRD

iOS

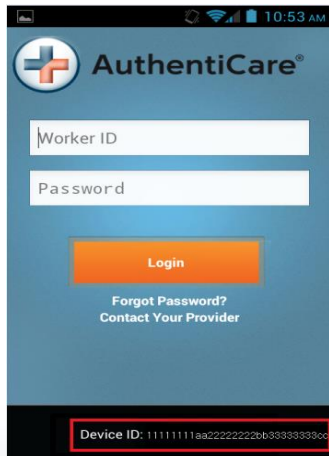

- Install from the Apple app store
- Start the app
- Accept free license agreement
- Enter setup code

Finding Device Id to put into Phoenix

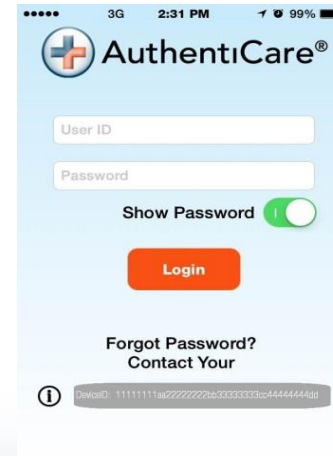

Android

- Go to Mobile App Login page
- Find and press Android menu button (Consult phone manual – Samsung hides.)
- Device Id appears at bottom of display
- Enter into Phoenix exactly as displayed (e.g. A1000020B7FB4799000213309510)
- Usually 14 character Hexadecimal (Uses “0” and “1”, NOT “O” or “l”)

iOS

- Go to Mobile App Login page
- Find and press information icon
- Device Id appears at bottom of display
- Enter into Phoenix exactly as displayed (e.g. 0A88817C-261D-495E-B1BE-D0FE06E8AC23)
- 36 character Hexadecimal with hyphens (Uses “0” and “1”, NOT “O” or “l”)
- If App is deleted and re-installed, Apple generates a different device id.

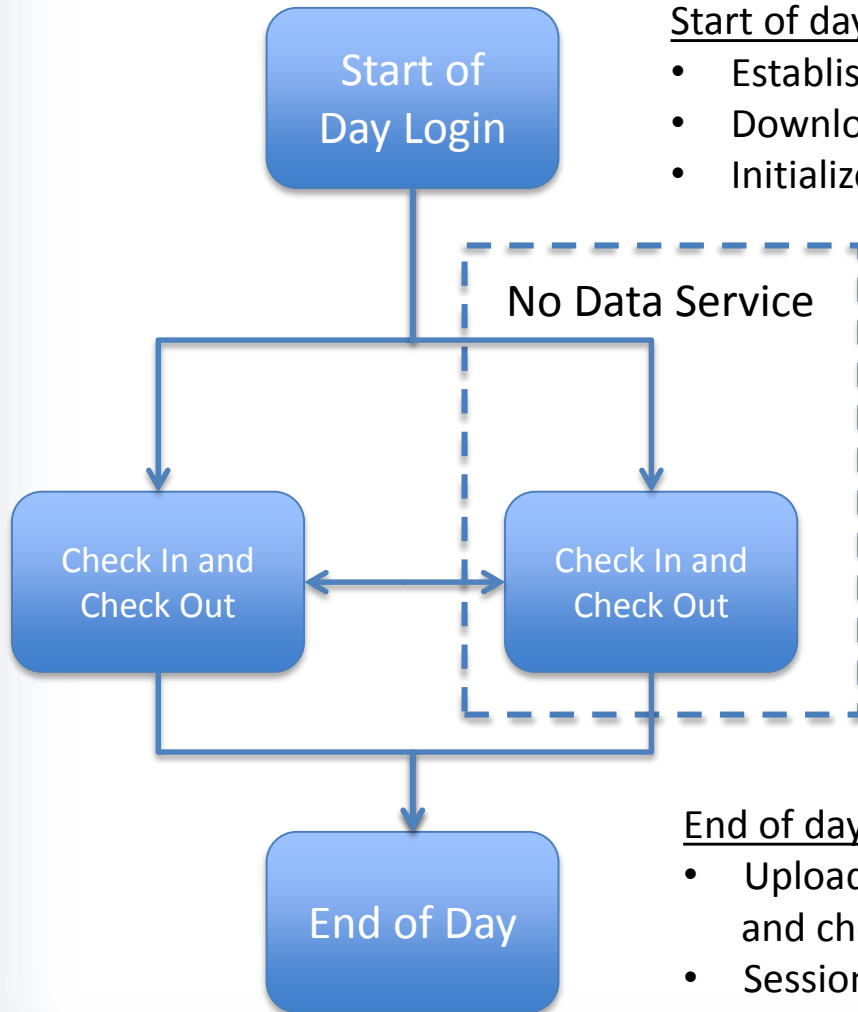

Training System Adaptations for Mobile

- Automatic setup: Device Id's copied from Production every 20 minutes during the business day. (No device id or worker set up needed.)
- Training scenarios shared statewide for all users.
- 30 minute checkout window. Scenario self clears every 30 minutes.
- Multiple sets of same scenarios for common services (e.g. In-Home Agency)
- Phone location is simulated – does not use actual GPS coordinates
- All scenario worker id passwords are **Pass22!!**
- User can lock themselves out or change passwords. Both are reset every 20 minutes during the business day.
- Some presentation differences between IVR, Android, and iOS

In-Home Agency Services					
First Four Digits of Worker Id	Last Four Digits of Worker Id	Sample Worker Id	Training Scenario	Client Names, CLTC Numbers, and Authorized Services	
0010 - 0019	1111 – English 2111 – Spanish	00121111	One client with authorized service in the home.	Mary Brown 1111011	Personal Care 2
0010 - 0019	1112 – English 2112 - Spanish	00121112	Two clients with an authorized service in the home.	Mary Brown 1112011	Personal Care 2
				Joe Brown 1112012	Personal Care 2

Using AuthentiCare Mobile App

Start of day:

- Establish daily session
- Download Worker profile
- Initialize app configuration

Tips and notes for best use:

- Try to use where there is signal
(Step out onto porch or stoop if needed)
- GPS works like satellite radio
(Best fix when there is view of the sky)
- If indoors stand near a window
- Beware of “Faraday cages”
(Metal buildings or aluminum trailers)

End of day:

- Upload queued check ins and check outs.
- Session expires at 2:00 AM

Q/R Card

Use: Clients with no land line or cell coverage
Worker needs to check in and out with
no data service available
Card stays in Client home
Worker scans card at check in and out

Process:

- Option to order card is presented to the worker when checking in or out
- Worker orders card from Mobile App
- Worker explains card to Client or family member
- Card arrives in US Mail 5-10 days later
- Client uses magnet to attach to refrigerator or somewhere handy
- Worker scans card at check in and check out

NOTE: If you are using a cell phone to check in and out today, you should have data coverage and not need a Q/R card.

Sample Letter and Card:

Columbia, SC 29202-8206

Jonathan Mills
11311 Cornell Park Drive, Suite 300
Cincinnati, OH 45242

Dear Jonathan Mills,

CLTC wants to make sure you are getting care at your home. Since 2002 we have been doing this by having workers authorized by CLTC make a toll free call to the Care Call system. You have received this card because you do not have a home land line phone for workers to use.

You have been mailed this card so that the personal care aide, companion, case manager, or nurse can use it when they make a visit to your home. Please place this card on your refrigerator or in a safe place so that workers can use it when they make a visit. Your workers will use their cell phone to scan this card for the Care Call system.

This card is not to be used as identification, for any reason.

If you have any questions about this card or have lost the card please send an email to authenticare.support@Firstdata.com. You can also call 1-800-641-4667 for help.

Sincerely,

CLTC

You will find a small magnet for your new card attached. Please peel the plastic backing from the adhesive on the magnet, and stick the magnet to the back of your card. You should then display the card on your refrigerator for easy access.

Using The App

Key Tips, Tricks, and Notes

- Get both your phones and workers registered in Phoenix now
- Use the menu button on the phone to get the Device Id in the app (NOT the “about this phone” page in settings)
- Device Id’s have 0’s and 1’s, NOT O’s and I’s. Apple Id’s have hyphens.
- On Android, when the user changes password on the phone during the work day, the OLD password works for the rest of the day. The new password takes over the next day. (This will be changed in new release.)
- On iOS, user password changes take effect immediately.
- Always log into the app in an area where you have good data signal at the beginning of the day and the end of the day.
- If you don’t have data connection when you want to check in or out, try to move somewhere where you do connect. Step outside if necessary.
- Practice, practice, practice on the Training site. There are scenarios for all the main types of services.
- Report problems so we can fix them and make this successful.

First Data Mobile Support

- Access: Phone: 800-441-4667
Email: AuthentiCare.Support@firstdata.com
- Please be prepared to provide:
 - Name and call or email back contact information
 - Description of the problem or question
 - Date/time of problem
 - Phone model number, Android or iOS version
 - AuthentiCare app version
 - Connected to data or not when problem occurred
 - Location of issue (office, home, outdoors, etc.)
 - Worker id
 - CLTC number
- Response:
 - Initial responder handles simple questions
 - More complex issues escalated to Tier 2 or 3 or the Product Team
 - Severe issues (e.g. outages) addressed immediately
 - Initial response to other issues within 24 hours
