

Community Long Term Care Phoenix and Care Call Training

July 2016

What is Phoenix

- ☞ Phoenix is a web-based software system.
- ☞ Phoenix is CLTC's comprehensive participant tracking system.
- ☞ Referrals, authorizations and terminations are created and transmitted through Phoenix.
- ☞ Phoenix is used for service monitoring and reporting.
- ☞ Phoenix submits billing for CLTC services.
- ☞ The preferred web browser for Phoenix is Google Chrome.
- ☞ Chrome is a free web browser that may be downloaded at www.google.com/chrome

Participant's Provider Choice

- ✎ When a service is needed, participants choose providers from a randomly generated list of all providers in their area.
- ✎ Participants order their choice of providers.
- ✎ Case managers make referrals in the order chosen by the participant.

Participant's Provider Choice

CLTC Waiver Service Providers

Please select at least five (5) providers from all attached pages by putting a 1 beside your first choice, 2 beside your second choice, etc. If you have questions or need help, call your case manager.

Participant: (0000025) Mickey Mouse

County: Richland

W06 Meals - Standard/Modified (Meals)

Provider Name	Notes	Phone #	City & State
_____ We Do It All	Hot Meal - Delivered daily Shelf Stable	(803) 416-4999	Columbia, SC
_____ Developer Day Care	Blast Frozen - Hot Pockets	(803) 444-4444	Columbia, SC

I attest that I have been informed of my options to receive services from CLTC and that I have made a choice of provider(s) listed above regarding the delivery of my care. Should my service needs change and/or I desire additional services, I will discuss my choice of provider with my case manager.

Signature of Participant or Primary Contact

Date

Nurse Consultant/Case Manager _____

Referral/Authorization Process

- ✎ Only information contained in the referral will be shared with providers.
- ✎ Providers are prohibited from asking for additional information.
- ✎ Case managers and nurses are prohibited from sharing additional information during the referral process.
- ✎ Information shared with the provider is based on the service (e.g. A personal care provider is given information on the home condition, but an incontinence supplies provider is not).

Referral/Authorization Process

- ☞ Phoenix sends providers an e-mail stating they have a referral (provider's e-mail address must be up to date in Phoenix).
- ☞ Phoenix will direct the provider to the Provider Portal to view the referral.
- ☞ Referrals must be acted upon within two working days (48 hours) excluding weekends and state holidays.
- ☞ If the referral is declined or not acted upon within two working days, Phoenix automatically sends the referral to the next provider.

Referral/Authorization Process

- ✎ If the referral is accepted by the provider, the case manager is notified and will enter an authorization in Phoenix.
- ✎ Once the authorization is completed by the case manager, the provider receives an e-mail directing them to Phoenix to access and accept the authorization.
- ✎ When a service is terminated, providers also receive an e-mail directing them to Phoenix to view the termination.

Phoenix Provider Portal

<https://providers.phoenix.scdhhs.gov/login>

The preferred web browser when using Phoenix is Google Chrome. It may be used with other browsers but users may experience some differences in appearance or functionality.

Provider Portal Initial Login

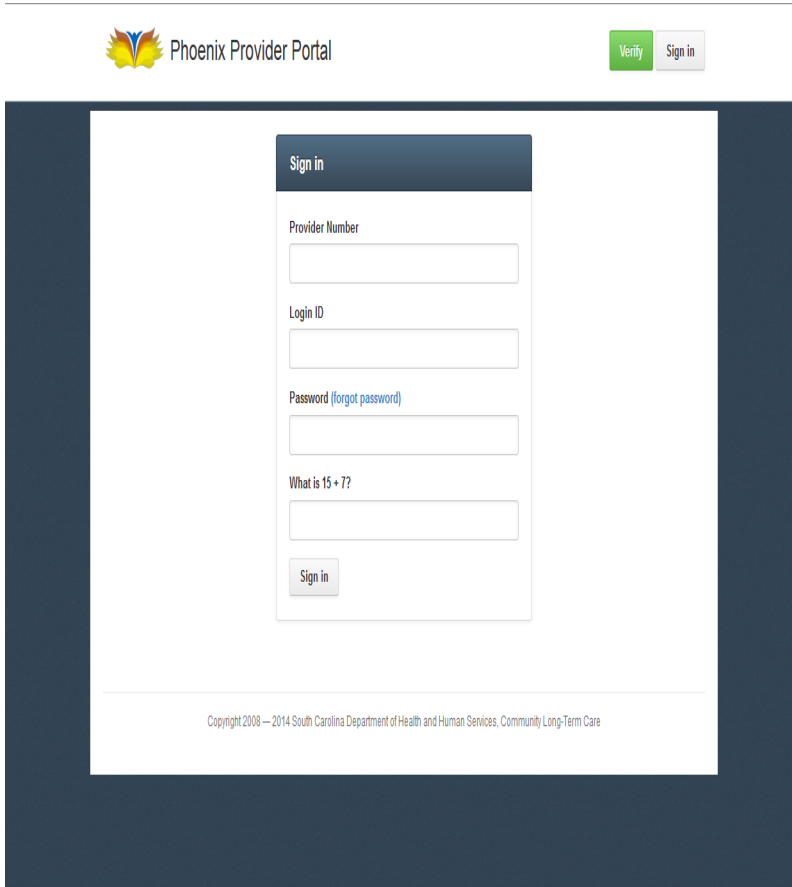

- ✎ When logging in for the first time, the provider must click the verify button in the top right corner of the login screen.
- ✎ Enter your
 - Medicaid provider number
 - Federal tax ID
 - CLTC provided password
 - New password (8-40 characters, must contain 3 of the following: upper case, lower case, number, symbol)
 - Repeat new password
 - Passwords cannot contain the provider's company name

Provider Portal Initial Login

Examples of Valid Passwords

- Phoenix1
- Wearethe#1agency!
- Gamecock\$
- tigerp@w5
- 3daycareDudes
- 1on1CareCompany
- Food4u

Provider Portal Login

The screenshot shows the Phoenix Provider Portal login interface. At the top left is the Phoenix logo and the text "Phoenix Provider Portal". At the top right are two buttons: "Verify" (green) and "Sign in" (grey). The main content area is a dark blue rectangle containing a white box with the "Sign in" form. The form has a dark blue header with the text "Sign in". Below the header are four input fields: "Provider Number", "Login ID", "Password (forgot password)", and "What is 15 + 7?". Each field has a corresponding input box. Below the last field is a "Sign in" button. At the bottom of the white box is a copyright notice: "Copyright 2008 — 2014 South Carolina Department of Health and Human Services, Community Long-Term Care".

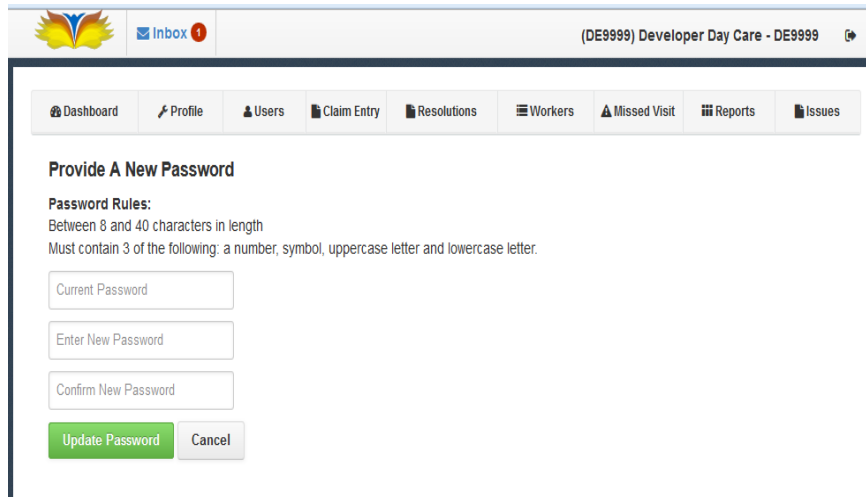

- ✎ The login screen contains four fields-Provider Number, Login ID, Password & math prob.
- ✎ Provider Number field and Login ID field will contain the same information in the beginning.
- ✎ When new users are created for your agency, they will have a different login ID and password.

Forgot Password

- ✎ The forgot password link on the login screen is only used to reset the main password for the agency – the administrator password.
- ✎ The user will be prompted to enter the provider number, federal tax ID number, CLTC assigned password and a new password.
- ✎ The user will receive a confirmation message that the password has been reset.
- ✎ To reset password for agency users other than the administrator, a new password should be keyed on the User's tab for that person.

Change Password

- ☞ To change your password once you are logged into the system, click the provider name at the top of the screen.
- ☞ The user will be asked to enter the current password, new password and to confirm the new password.
- ☞ Click the Update Password button

The screenshot shows a web application interface for changing a password. At the top, there is a header bar with a logo on the left, an 'Inbox' notification with a red circle containing the number '1', and the text '(DE9999) Developer Day Care - DE9999' on the right. Below the header is a navigation menu with several tabs: 'Dashboard', 'Profile', 'Users', 'Claim Entry', 'Resolutions', 'Workers', 'Missed Visit', 'Reports', and 'Issues'. The 'Profile' tab is currently selected. The main content area is titled 'Provide A New Password'. Below this title, there are 'Password Rules' listed: 'Between 8 and 40 characters in length' and 'Must contain 3 of the following: a number, symbol, uppercase letter and lowercase letter.' There are three input fields: 'Current Password', 'Enter New Password', and 'Confirm New Password'. At the bottom of the form, there are two buttons: a green 'Update Password' button and a grey 'Cancel' button.

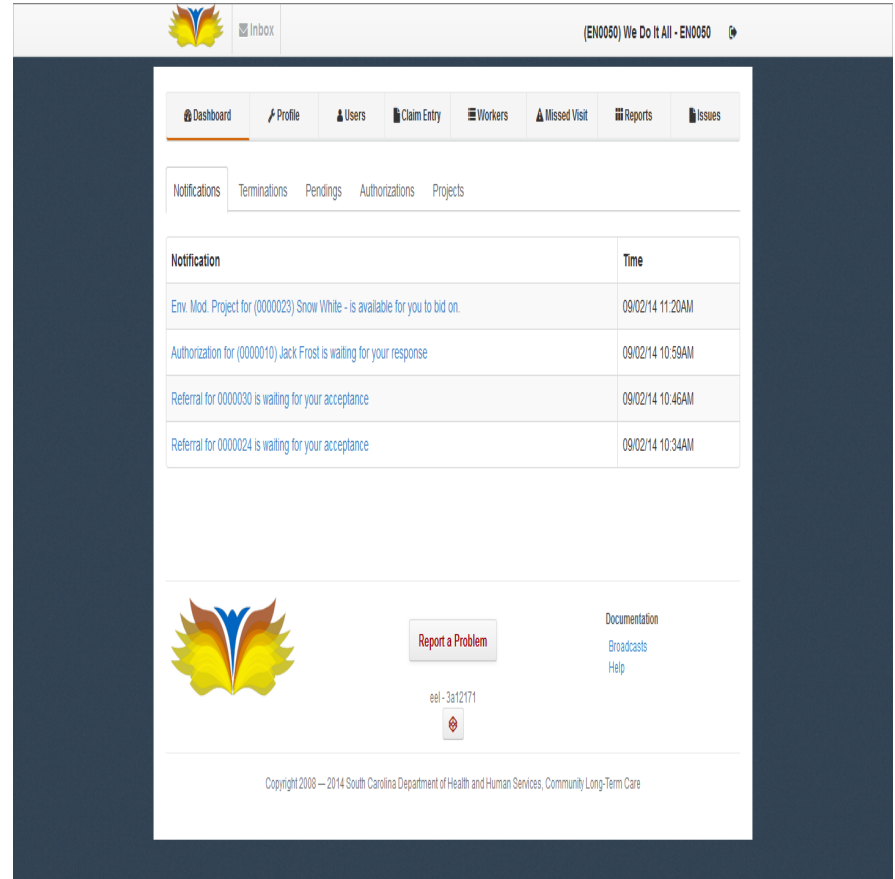

Phoenix Provider Dashboard

- ☞ Once the user logs in to the provider portal, the user will be on the provider dashboard.
- ☞ Most dashboards have four tabs
 - Notifications
 - Terminations
 - Pending
 - Authorizations
- ☞ Enhanced Environmental Modification providers will have an additional tab titled Projects.

Dashboard – Notifications Tab

Information on the Notifications tab requires an action.

- This section contains
- Referrals that have not been accepted or declined
 - Authorizations that have not been accepted or declined
 - Environmental Modification Projects available to bid on (only for E-mod providers)

The screenshot shows a web application interface for a user named (EN0050) We Do It All - EN0050. The top navigation bar includes a logo and an 'Inbox' link. Below this, a secondary navigation bar contains links for Dashboard, Profile, Users, Claim Entry, Workers, Missed Visit, Reports, and Issues. The main content area is titled 'Notifications' and includes sub-tabs for Terminations, Pending, Authorizations, and Projects. A table displays four notifications:

Notification	Time
Env. Mod. Project for (0000023) Snow White - is available for you to bid on.	09/02/14 11:20AM
Authorization for (0000010) Jack Frost is waiting for your response	09/02/14 10:59AM
Referral for 0000030 is waiting for your acceptance	09/02/14 10:46AM
Referral for 0000024 is waiting for your acceptance	09/02/14 10:34AM

Below the table, there is a logo, a 'Report a Problem' button, and a 'Documentation' link with sub-links for 'Broadcasts' and 'Help'. The footer contains the text: 'Copyright 2008 — 2014 South Carolina Department of Health and Human Services, Community Long-Term Care'.

Notifications - Referrals

- ✎ A referral is a request for service.
- ✎ The provider will only get enough information to make a decision to accept or decline the request.
- ✎ The referral information given depends on the type of service.
- ✎ The provider may accept or decline the referral the with or without comments.
- ✎ If a referral is accepted, it moves from the Notifications tab to the Pending Tab.
- ✎ If a referral is declined, it is no longer visible to the provider.

Task Checklist

Notifications - Authorizations

- ⌘ Authorizations on the notifications tab indicate that the provider has **not** accepted/declined the authorization.
- ⌘ Although the referral may already have been accepted, the provider must accept the authorization as well.
- ⌘ When an authorization is accepted, it moves from Notifications to the Authorizations Tab of Phoenix.
- ⌘ If the authorization is declined, the authorization is no longer visible to the provider. The case manager receives a notification that the provider declined. The case manager must then terminate the authorization in Phoenix.

Notifications – Environmental Modification Project

- ✎ This notification indicates an environmental modification project is available and the provider may bid on the job.
- ✎ The notification goes to every environmental modifications provider who serves the county of residence for the participant.
- ✎ If the provider wants to bid, enter an amount to do the job. Comments may be entered also.
- ✎ The provider may remove or edit the bid before the bidding period has ended.
- ✎ Once the bidding period has ended, the environmental modification specialist will accept the best bid and it will display on the projects tab of the provider.

Notifications – Environmental Modification Project

Environmental modification request for (0000023) Snow White

Participant	(0000023) Snow White
Address	46 Main Street , Cola., SC 29209

\$ 0.00

Description & notes

Submit Bid

Dashboard – Terminations Tab

- ✎ This section contains notifications of recent terminations.
- ✎ Terminations are removed from this tab when the termination date is more than 14 days ago.
- ✎ When terminations are removed from this tab, they may still be viewed on the Authorizations Tab under the closed authorizations section.
- ✎ This tab is informational only. No action needs to be taken on the termination notice. The provider must make sure services are stopped by the termination date.

Dashboard – Pending Tab

- ✎ This tab shows all of the referrals the provider has accepted that are awaiting case manager approval.
- ✎ The Pending Tab lets the provider know they have accepted a referral and are waiting for the authorization from the case manager to begin services.
- ✎ Once the case manager sends the authorization, the person will be removed from the pending tab.
- ✎ For environmental modification providers, ramp referrals that were accepted by the provider will display on this tab until the provider completes the ramp completion form and sends it to the case manager.
- ✎ For incontinence supplies providers, the referral should remain on this tab until the provider notifies the case manager the physician form has been returned and it states the participant is incontinent.

Dashboard – Authorizations Tab

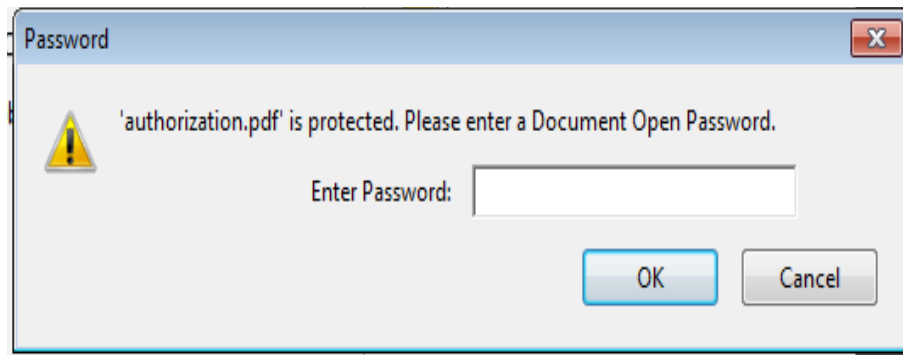

- ✎ This section displays all CLTC authorizations for a provider.
- ✎ There are two sub-tabs: Open and Closed.
- ✎ The Open Tab displays all currently open authorizations and those with a termination date less than 14 days ago.
- ✎ The Closed Tab displays all past authorizations for the agency.
- ✎ There is a sort function on the screen to change how the data is displayed.
- ✎ The search feature allows the user to search for a participant by name or CLTC number.

Dashboard – Authorizations Tab

- ✎ Clicking the participant's CLTC number or name will take the user to the authorization.
- ✎ Clicking the Service Plan date will take the user to the participant's latest service plan.
- ✎ Some services will have a service plan attached (e.g. PCI, PCII, Companion, Nursing and ADHC) and others will not (e.g. Meals, Incontinence Supplies, Telemonitoring, etc.).
- ✎ A PDF reader must be used to view authorizations, services plans and forms.

Dashboard – Authorizations Tab

- ✎ A full authorization (Service Provision Form) may be viewed by clicking the Preview button.
- ✎ A password is required to view the authorization, service plan or physician form.
- ✎ The password is the CLTC number of the participant.

Dashboard – Authorizations Tab

For incontinence supplies providers

- If you click a participant's name on the authorizations tab, you will be taken to the authorization and there will be two tabs: Authorization and Forms.
- The Forms tab will show all of the Physician Forms.
- There is a button for each form to indicate if it was received back from the physician.
- There is a button to create a new form to send to the physician.

Conversations

- ✎ Conversations are a secure way for case managers, providers and CLTC staff to exchange messages within the Phoenix system.
- ✎ Conversations may serve as an alternative to e-mailing or calling the case manager.
- ✎ E-mailing a case manager could possibly cause a HIPAA violation if any protected health information is contained in the e-mail.
- ✎ A new conversation may be started by going to the Authorizations tab on the dashboard and clicking the conversation bubble icon beside the participant's name.

Profile Tab

∞ The Profile tab displays the provider agency information

∞ There are four sub-tabs:

- The General Info tab displays the provider's address, phone numbers, e-mail addresses, provider services, etc.
- The Holidays tab displays the holidays observed by the provider agency. This alerts CLTC that the provider office will be closed on those days. Custom holidays may be added.
- The Counties Served tab displays the counties served by your agency on a map. The counties served are shaded and you may click on a county to see services provided for that county.
- The mobile devices tab only applies to providers of in-home services. Providers may register agency owned cell phones to be used with the mobile application in this section.

Users Tab

- ✎ The purpose of the Users tab is to set up the agency office workers with their own Provider Portal login ID and password
- ✎ Phoenix Provider Portal users from your agency should not share the same password. Each person who uses the system should have his/her own password.
- ✎ The administrator has to ability to set up other users, give them a temporary password and give them the access level they need.
- ✎ The new user will change the password once the login
- ✎ When a worker leaves the agency, **a termination date should be entered for that worker immediately.**

Workers Tab

- ✎ The Workers Tab is used to register any worker who will provide in-home services.
- ✎ Workers should be registered **before** they go into a participant's home to provide services.
- ✎ An eight digit worker ID must be assigned to each worker.
 - The first four digits will be the provider number.
 - The last four digits can be any numbers the provider chooses.
 - Some use the last four digits of the SSN to make it easy to remember.
 - Once keyed and saved, the worker ID cannot be changed.

Workers Tab

- ✎ The worker start date should be the date the worker will first go into a participant's home to provide services.
- ✎ Workers will receive a 30 day grace period to learn the system. After the grace period workers may accrue strikes.
- ✎ Each service that the worker is qualified to provide should be checked.
- ✎ If the worker will use the mobile application with his/her phone, the mobile phone number and the mobile device ID must be entered. A password must also be keyed for the worker. The worker will change it later.

Missed Visits Tab

- ✎ Personal Care providers and ADHC providers are required to enter a reason for any day there is an authorization to provide services but no service is provided.
- ✎ The user will enter a date range to see any visits missed during that time.
- ✎ Select the appropriate missed visit reason and click Save at the bottom of the screen.
- ✎ Providers and case managers may run a Missed Visit Report to see the reasons entered for the missed visits.

Missed Visits Tab

The missed visit reasons are as follows:

- Attended less than 5 hours – this would be used by ADHC agencies who can't bill if the participant did not stay at least 5 hours.
- Holiday – the agency was closed due to a holiday.
- Missed Visit – the participant desired services and the agency was not able to provide them as authorized.
- Service Interruption – the participant is unavailable for services. For example, the participant was in the hospital or the participant declined services that day.
- Other – a reason that does not fit into any of the above categories. This should be rarely used and the case manager should be notified why the service was not provided.

Report A Problem

- ✂ The Report a Problem button is located at the bottom of each Phoenix screen. A rectangular button with a light gray background and a thin border. The text "Report a Problem" is written in a red, sans-serif font.
- ✂ The button is used to report problems with the Phoenix system or request a change in Phoenix.
- ✂ Issues reported will go to a Phoenix help desk person, a Phoenix developer or a CLTC staff person for resolution.
- ✂ Case managers and area office staff do not receive the Report a Problem issues.
- ✂ Issues should be specific and give all details needed to correct the issue.

Report A Problem

- ✎ Additional information may be requested from the reporter of the issue.
- ✎ The user must respond to the issue in Phoenix, not by e-mail.
- ✎ Issues may be close in 72 hours if no response is received.
- ✎ Providers may find all issues, open and closed, on the Issues tab in Phoenix.
- ✎ The user will click the issue they wish to respond to and type the comment.
- ✎ E-mail notifications no longer contain the issue text.

Phoenix Questions?

Care Call

Care Call

- ✎ Care Call is an Interactive Voice Response System (IVRS) used to document in-home services.
- ✎ Workers call a toll free phone number, 1-888-978-CARE(2273), using the participant's landline phone to document service delivery.
- ✎ Providers of Children's Medical Daycare use the facility's phone to check in/out.
- ✎ Care Call recognizes the CLTC participant's authorized phone number(s), the worker ID and the provider.
- ✎ Workers have the ability to select which service(s) will be performed.

Care Call

- Services such as Personal Care I/II, Attendant, Children's Medical Daycare and Case Management require two phone calls, a check-in call and a check-out call.
- Billing is submitted for the amount of time between the check-in call and the check-out call.
- Services such as Pest Control and Nurse Supervisory Visit require one call into Care Call.
- Workers should always have the participant's seven digit CLTC number available in case Care Call does not recognize the participant's authorized phone number and requests that the number be keyed.

Care Call

- ✎ Workers should always listen to make sure they hear the correct worker name, provider name, participant name and service called back.
- ✎ If something is incorrect, the worker should correct it or hang up and start the call again.
- ✎ Workers of personal care, nursing or case management services are required to enter the activities (tasks) done during the visit in order to check-out.
- ✎ Care Call users may enter observations if they have any new observations which have not been reported to the case manager previously.

Care Call

- ✎ Workers may check in for multiple participants on the same phone call(except case management).
- ✎ Workers may check in for multiple services on the same phone call if they are like services such as PCI, PCII and/or Companion Agency.
- ✎ When working a split schedule (perform a service twice a day) some adjustments may need to be made on the phone calls. For example, if a worker does PCI and PCII services in the morning and then comes back to do PCII again in the evening, the worker must check in/out for each service individually to be paid correctly.

Mobile Application

- ✧ The mobile app was developed due to a trend away from landline phones.
- ✧ A mobile application is available to check in/out for in-home services as an alternative to using the participant's phone.
- ✧ The mobile application is currently available for use with Android smartphones and iPhones.
- ✧ The mobile application uses the phone's GPS services to indicate if the worker was at the participant's home at the time of check in/out.
- ✧ The mobile devices will have to be registered in the Provider Portal before use with the mobile app.
- ✧ Effective **April 1, 2016**, mobile app use is mandatory for participants without a landline phone.

Download Mobile App

Android Phone

- Download the mobile app from the Google Play Store
- The name of the app is Authenticare®
- Accept Terms and Conditions and download app
- User will be asked to enter a setup code
 - SCDHHSPRD for the production (live) environment
 - SCTRINPRD for the training environment (information to use in the training environment is location in the help section of Phoenix)
- On the mobile app login screen, press the phone's menu button to display the phone's device ID
- The device ID must be used to register the phone for mobile app use

Download Mobile App

iPhone

- Download the mobile app from the iPhone App Store
- The app will be listed as Authenticare®
- Accept Terms and Conditions
- User will be asked to enter a setup code
 - SCDHHSPRD for the production (live) environment
 - SCTRAINPRD for the training environment (information to use in the training environment is location in the help section of Phoenix)
- On the mobile app login screen, click the information symbol (i) in the lower, left corner of the screen to display the phone's device ID
- The device ID must be used to register the phone for mobile app use

Six Strike Policy For In-Home Services

- ✧ The Six Strike policy applies to providers of Personal Care I and II, Children's Personal Care, Attendant, Companion and Nursing services.
- ✧ One strike will be given to a worker for each incident where a resolution must be done and no valid reason is given.
- ✧ After the sixth strike, CLTC staff will no longer accept resolutions for that worker if no valid and verified reason is given.
- ✧ Workers who are new to the Care Call system will have a one month grace period to learn the system. Re-hired workers will not get this grace period.
- ✧ After one year, each worker begins a new strike period.
- ✧ Workers will be given one strike per incident, per participant.

Six Strike Policy For In-Home Services

- ✂ Resolutions not submitted timely will receive a strike.
- ✂ Providers must submit the resolution within 10 days from the Sunday following the date of service to be timely.
- ✂ Providers must inform the case manager of any problems using the agreed upon phone or the mobile app by the next business day to avoid receiving strikes.
- ✂ We recommend using the conversation feature in Phoenix to report problems using the participant's phone.
- ✂ Users may run the Infractions By Worker report in Phoenix to monitor worker strikes.
- ✂ Contact the area office for resolution problems or questions

Six Strike Policy for In Home Services

- ✧ An updated version of the strike policy will be posted by the end of the July 2016
- ✧ The changes were related to the mobile app
- ✧ If the participant has a landline phone but the phone is not in service when the worker arrives, the provider may submit a resolution
- ✧ If the phone is still not working after the second day, the worker must be prepared to use a mobile app on the third day or the provider must notify the case manager they are relinquishing the case
- ✧ If the participant's landline phone is regularly out of service (2-3 times per month), the mobile app must be used for the participant

Additional Notes

- Providers of in-home services should document all services provided to a participant in Care Call .
- Care Call or the mobile app will record the claim even if there is no current authorization in place.
- Care Call/mobile app will not accept single claims over 14 hours
- Adult Day Health Care and Incontinence Supplies providers are responsible for getting physician's orders **before** providing services.
- Providers are responsible for checking Medicaid eligibility for participants.
- There is a Care Call training environment and Mobile App training environment available to train your workers.
- There are numerous user guides and help documents in Help section of the Provider Portal.

Care Call/App Questions?
