

Claim Resolution Training

Providers are required to use The **Electronic Visit Verification System (EVV)** which includes **Care Call** and the **Mobile Application** to generate claims for payment for services.

A screenshot of a mobile application interface for "Visits" and "Calendar". The top status bar shows the time as 4:33 PM. Below the navigation bar, there is a section titled "Today's Visits - 06/03/2015" with a medical cross icon. The main content area is titled "Check-In" and displays client information: "Brown, J", "Home", "7 B Street", "Toombs, SC 29999", and a phone number "912-555-5555". Below this, there is a "Service:" dropdown menu showing "1 service selected" and "Personal Care 2". There is also a "Multi-Client:" field and an "Add a Client" button. At the bottom, there is a large orange "Submit Check-In" button.

If provider/provider workers **fail** to complete a claim using EVV a payment is not generated and forward to MMIS for payment. **A resolution then becomes necessary.**

Webster Defines Resolution as “the act or process of resolving”.

Provider Agencies create resolutions through their Phoenix Provider Portal and submit via Phoenix for resolving.

DLTL staff may deny a claim resolution for reasons listed below.

- **Duplicate Claim.**
- **Services not provided.**
- **Worker at strike (12) limit.**

If a claim is denied, DLTL staff must select a reason for denial.

The screenshot shows a web application for managing Medicaid claims. It features a table with two rows of claim data. The first row is highlighted in light blue. A red arrow points to the 'Denied' dropdown menu in the first row. A dropdown menu is open, showing a list of reasons for denial. The table columns include dates, claim numbers, provider names, locations, service types, times, and reasons for denial. The dropdown menu is titled 'Determination' and lists several reasons for denial.

[Located in Phoenix Help](#)

Workers who are new to the Electronic Visit Verification system (EVVS) will have a **one-month grace period** to learn the system before strikes begin to be issued. Accept claims during this period.

Service Date	Claim #	Submission Date	Provider	Worker ID, Name, Strikes	Area, Client #, Name	Service	Check In/Check Out	Exception Reason	Timely	Case Manager	CLTC Action Determination

Phoenix will alert you that worker is in Grace Period.

One strike will be given to a worker for each incident where a resolution must be done and no valid reason is given.

For example, if worker is providing **Personal Care I & II** services for a participant and checks in for both services but fails to check out, only **one strike** will be given to correct both the PCI & PCII claims.

The screenshot displays a software interface for managing Medicaid claims. It features two rows of claim data, each with a light blue background. The top row is for 'Personal Care I' and the bottom row is for 'Personal Care II'. Both rows show a date of '05/03/2019' with a 'New Claim' status. The service dates are '05/15/2019'. The service area is 'Palmetto'. The service type is 'Rest'. The claim number is '1'. The service time is '06:00 PM' to '08:00 PM'. The reason for the claim is 'Client's Phone Not Functioning'. The status is 'Yes'. The interface includes a 'Determination' dropdown menu, a 'Comment' button, and an 'Action' dropdown menu. Red arrows point to the end times of the claims.

Claim ID	Date	Status	Service Date	Service Area	Service Type	Claim Number	Service Time	Reason	Status	Action

Phoenix will automatically calculate the number of strikes for each strike assignment.

Providers should report any problems using the participant's landline phone or the mobile app immediately **(by the next business day)** to case manager or Area Office. Provider may use **narrative conversation** to report phone problems.

[Redacted] wrote on 05/06/2019 09:10 AM...

Hi Hilary, The aide was unable to clock out on 5/3 due to landline phone issues. The services were completed. A resolution will be submitted accordingly.

Thanks [Redacted]

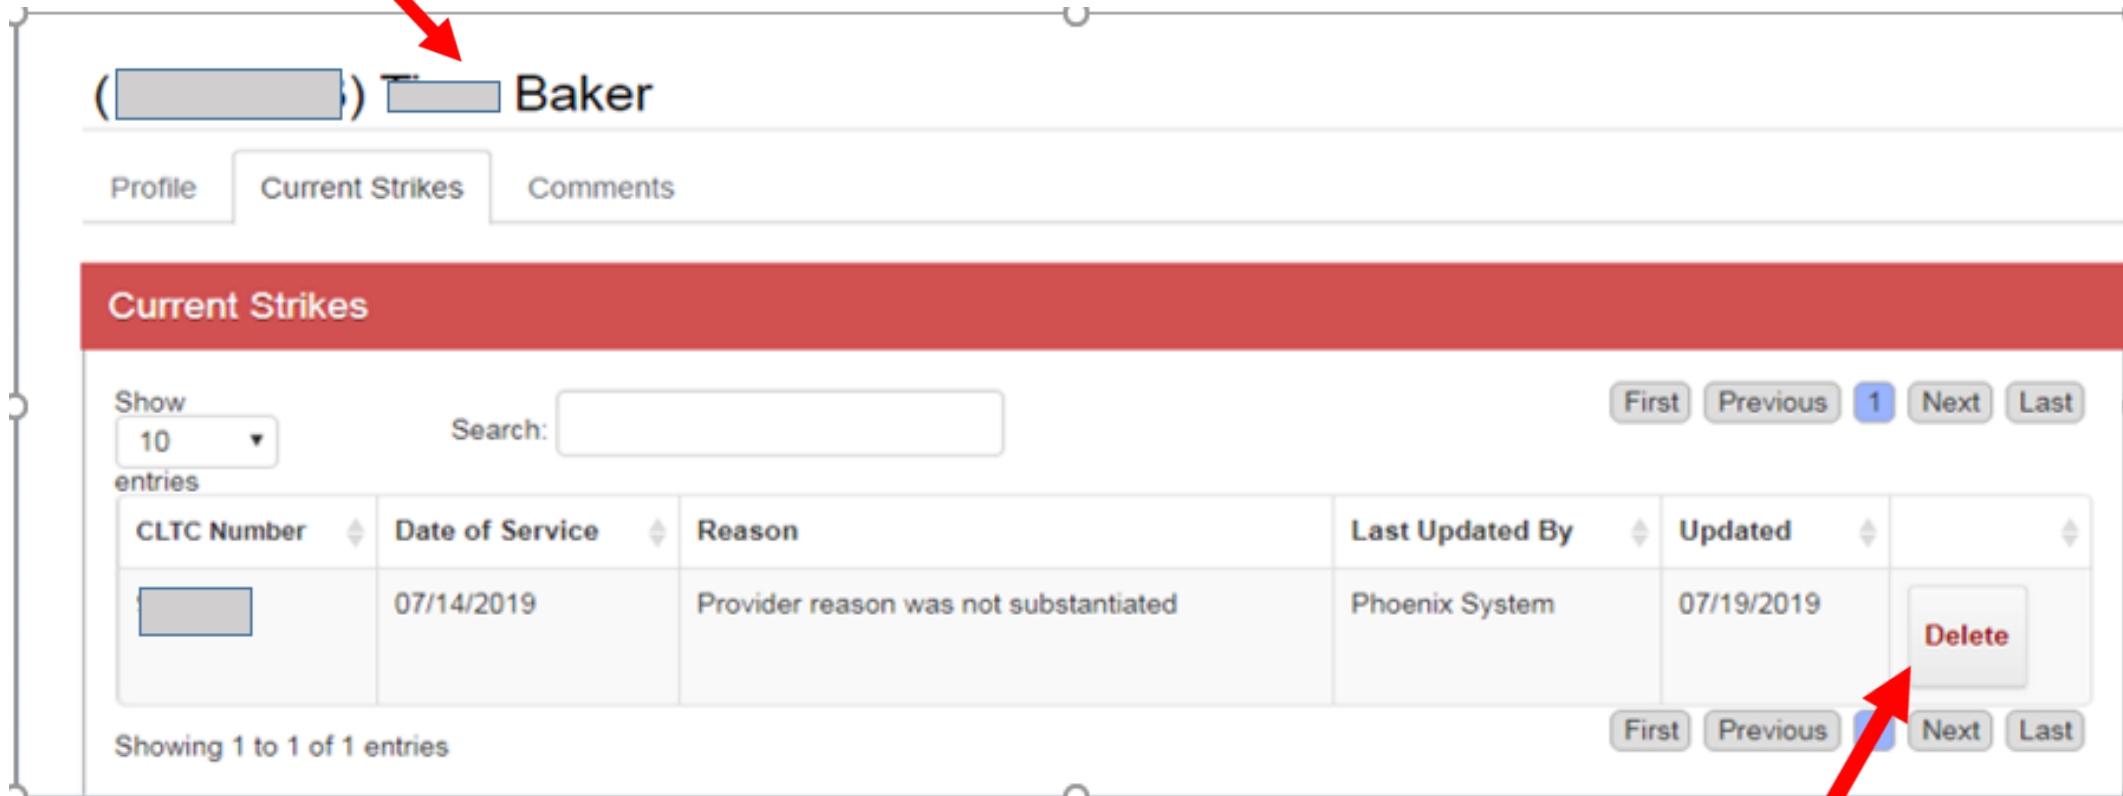

Strike assigned to a worker in error can be deleted.

Go to worker's provider agency dashboard and select Workers.

Select Worker- Locate the date strike was assigned in error.
